**FIRE FIGHTING
ENGINE PUMP CONTROLLER**

- Fire pump controllers according to EN/BS 12845
- Remote alarm panels according to EN/BS 12845
- Advanced programmable I/O functions to control the fire fighting system
- Expandable with EXP modules
- Controllers and expansion modules with tropicalized PCB
- Controllers with built-in NFC technology
- RS485 and Ethernet communication interfaces
- Setup and supervision software
- Modem control for sending alarm messages and emails.

FFL800DP

General characteristics

FFL...DP controllers integrate all the functions required by the EN/BS 12845 standard regarding the diesel engine fire pump management and help the user to monitor and maintain the performance of the entire firefighting system.

The backlit graphic 128x80 pixel LCD display ensures high visibility in low light conditions.

Inputs and outputs are programmable and the number can be increased with the I/O expansion modules (FFL800DP), moreover they can be managed by the integrated PLC logic. This all means a complete solution with less wiring, less components and less programming to set up the firefighting system. Within the main page, it is possible to see all the information about the engine fire pump.

Functions for the maintenance and the test of the firefighting system are available directly on the display. Furthermore there is the possibility to receive remotely this information by the digital outputs or the Modbus communication through the built-in RS485.

The controller monitors constantly the temperature inside the pump room using the integrated or an external temperature sensor and the status of the auxiliary voltage with the single-phase AC voltage measurement input.

Features

- Automatic diesel engine fire pump control
- Backlit graphic LCD display with 5 languages (ENG, ITA, FRA, SPA, DEU)
- Synoptic with 9 LEDs to display operating modes and status
- Dual DC power supply from two separate batteries 12/24VDC
- Dedicated page for LED test and commissioning
- Dedicated page for jockey pump monitoring
- Automatic starting sequence according to EN/BS 12845
- Input of single-phase AC voltage measurement for charger power supply monitoring
- 10 programmable digital inputs
- Input to monitor the starter pinion
- Input for engine speed reading W and pick-up
- Input for monitor the D + voltage from alternator battery charger
- 10 programmable relay outputs
- 1 programmable static output
- 3 analog inputs for resistive sensors programmable usable for the monitoring of oil pressure, coolant temperature, oil temperature and fuel level
- Built-in NTC temperature sensor
- Input for remotable NTC temperature sensor (measuring range: -40...+85°C)
- 2 password levels
- Advanced I/O functions
- Built-in isolated RS485 communication port
- Integrated PLC logic with thresholds, counters, alarms, status
- Built-in real time clock
- Storage of last 128 events
- Communication interface with front optical port, compatible with USB (CX01) and Wi-Fi (CX02) devices
- NFC connectivity for programming via LOVATO NFC App, freely downloadable from Google Play Store and App Store
- Expandability with 2 EXP... modules with tropicalized PCB (only FFL800DP)
- Compatible with FFLRA... remote alarm panels
- Compatible with software Xpress, Synergy, Synergy_{cloud} and App NFC and Sam1.

Operational characteristics

- Power supply voltage: 12 or 24VDC
- Voltage measurement inputs:
 - Rated voltage U_e: 100...240VAC
 - Measurement range: 50...264VAC
 - Frequency range: 45...65Hz
- Operating temperature: -25...+70°C
- PCB tropicalized
- Degree of protection: IP65 on front. IP20 on terminals.

General characteristics FFLRA200

FFLRA200 is a simple remote annunciator for the displaying via LEDs of the alarm status of two motor pump or electric pump controllers FFL... series.

The communication between the remote indicator and the FFL... controllers takes place via a pulsed digital signal. On the front of the panel there are two columns of LEDs referring to each of the fire pump controllers. The LEDs are equipped with user-customizable labels to identify alarms, that are included in the package. A template of alarm labels model can be downloaded from www.LovatoElectric.com. FFLRA200 is also equipped with a buzzer with sound level in compliance with the EN12845 standard, as well as buttons for silencing the alarms and for the LED test. The alarms notified on the remote panel are configurable directly on the FFL controllers. No setup on the FFLRA200 remote panel is required.

3 status LEDs indicate the presence of the power supply, the status of the communication and general failure.

FFLRA200 is supplied with voltage 100...240VAC and it supports a backup battery 12VDC (not included) whose buffer charge is maintained automatically.

Operational characteristics

- Power supply rated voltage: 100...240VAC
- Voltage operating range: 90...264VAC
- Frequency range: 45...66Hz
- Arrangement for internal battery 12VDC support is built-in (battery is not included)
- Compatible software: **NFC** App freely downloadable from Google Play Store and App Store
- Operating temperature: -25...+50°C
- Degree of protection: IP40.

Compliance

Compliant with standards: UNI EN/BS 12845, IEC/EN/BS 61010-1, IEC/EN/BS 61010-2-030, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3.

General characteristics FFLRA400

FFLRA400 is an advanced remote annunciator with backlit graphic LCD display. It is expandable with 2 EXP modules to increase its features in terms of communication, digital inputs and digital outputs.

The communication between the remote panel and the FFL controller is performed by means of a pulsed signal or through RS485 if the EXP1012 expansion module is added. Up to 3 FFL controllers can be connected to one FFLRA400 with RS485 communication. On the front of the remote alarm panel, LEDs and a buzzer are present to display and notify the alarms and to see them from a distance; at the same time a complete description of the alarms is available on the graphic LCD display.

The texts are available in 10 different languages: English, Italian, French, Spanish, German, Portuguese, Russian, Polish, Czech and Turkish.

By fitting the EXP1015 expansion module, the remote annunciator is automatically equipped and configured with a GSM/GPRS modem. Once a data-enabled SIM card is inserted, SMS with alarms or events and email messages can be transmitted by the remote annunciator.

Operational characteristics

- Power supply rated voltage: 100...240VAC
- Voltage operating range: 90...264VAC
- Frequency range: 47...63Hz
- Arrangement for internal battery 12VDC support (battery not included) is built-in
- 6 digital inputs, 5 of which are programmable
- 3 programmable relay outputs
- Expandability with EXP... modules (2 available slots)
- Optical port on front for CX01 and CX02 device
- Compatible software: **S_{am}1**, **X_{press}**, **NFC**, **Synergy** and **Synergy_{cloud}** software (see section 36)
- Degree of protection: IP40
- Operating temperature: -25...+50°C.
